Agenda

01 Embed AI Natively in ABAP Applications

02 Intelligent Scenario Lifecycle Management (ISLM)
Overview

03 Roadmap

04 Demo: Building Custom AI use cases

Unlock value for your Business

Everywhere

ERP and finance

Supply chain

Customer experience

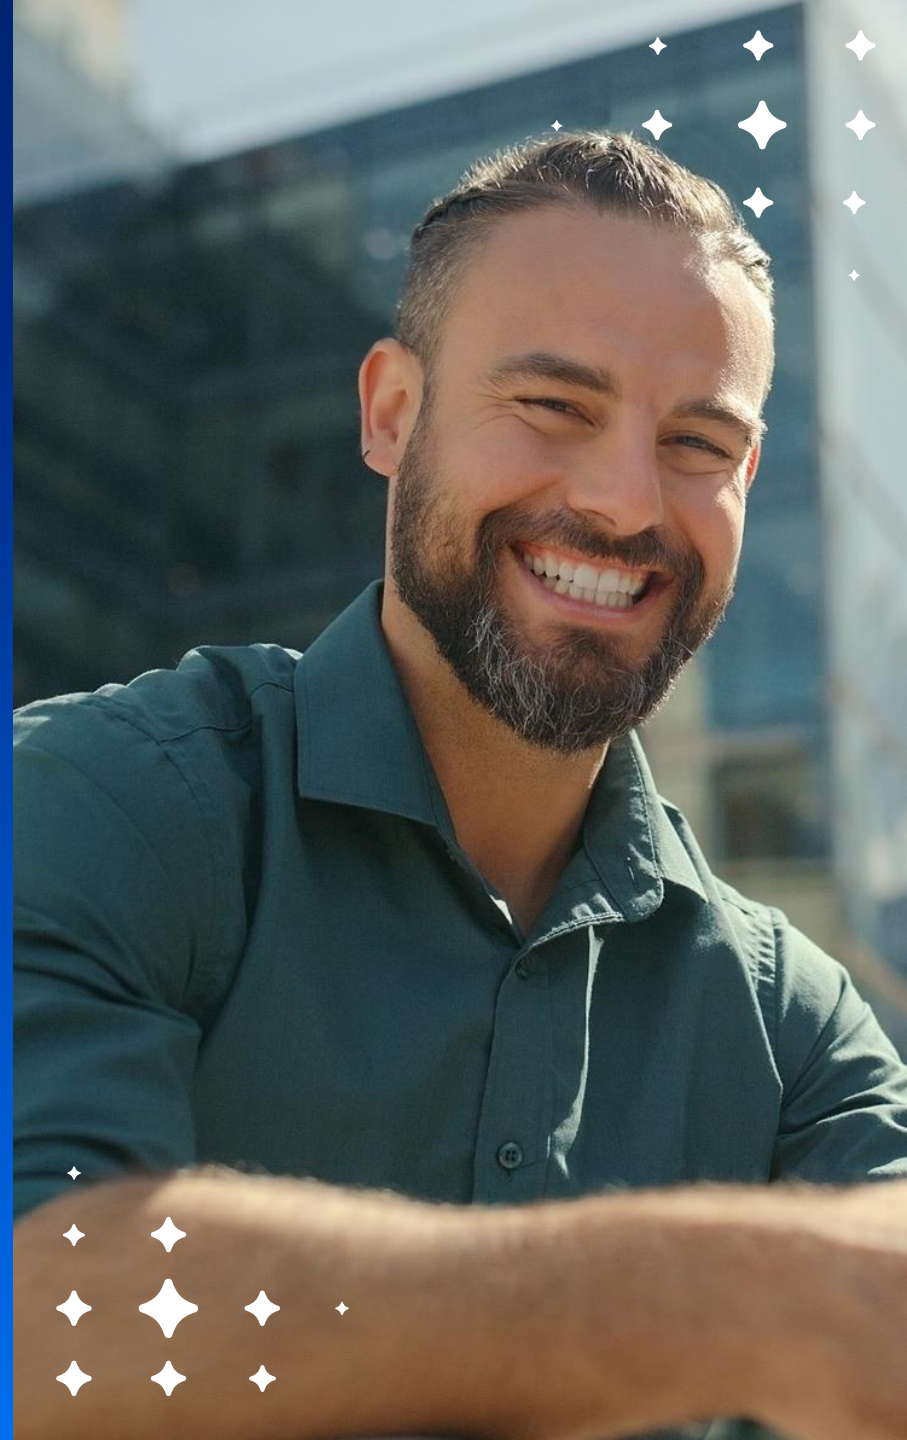

Procurement

Human resources

IT and cross-function

with SAP Business AI

Intelligent Scenario Lifecycle Management (ISLM): Overview

Intelligent Scenario Lifecycle Management (ISLM)

SAP Business AI in every ABAP process

Native

Consume AI directly, within SAP S/4HANA through ISLM, available across all editions, without additional middleware, infrastructure, or licensing.

Proven

Built on the same framework SAP uses for its own embedded AI scenarios, production-hardened, with lifecycle management and governance already in place.

Custom AI

Build your own custom AI solutions on the same foundation, with end-to-end lifecycle management and governance from day one.

SAP-delivered & custom use cases

All SAP S/4HANA editions

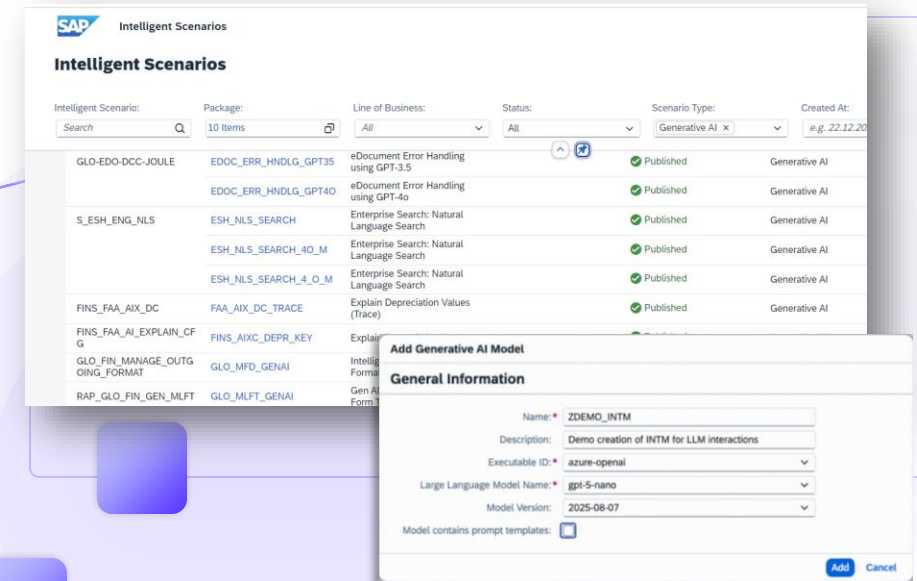

Model-agnostic

System Triggered Agents

Generative AI Hub

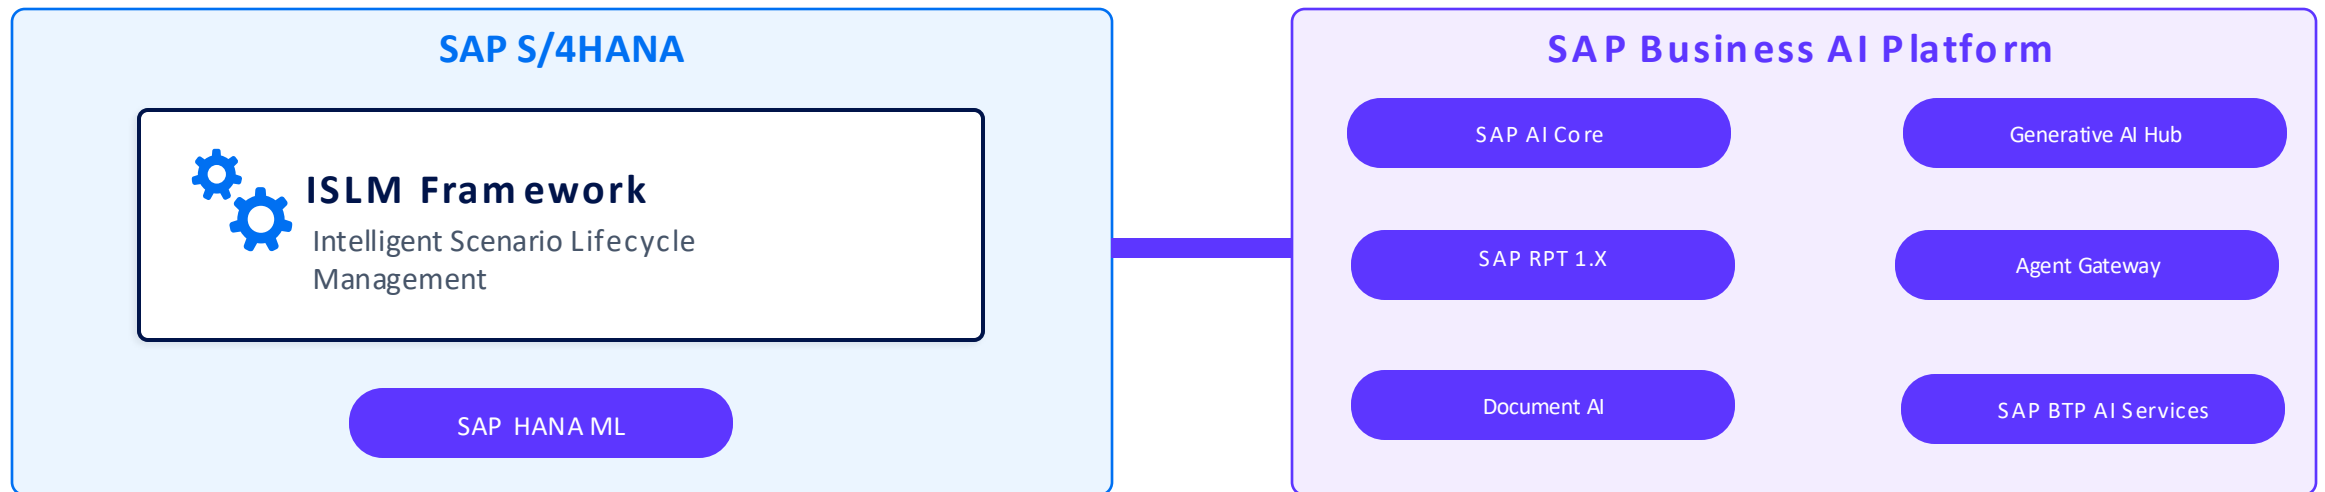

SAP-RPT-1.X

SAP Document AI

Integrate & Operate AI Natively in ABAP Business Applications with ISLM

- Standardized **ABAP-native AI framework** for building, integrating, and operating AI use cases across **SAP S/4HANA editions and Environment**.
- ISLM enables seamless integration and management of AI use cases leveraging **Generative AI Hub, AI services** available on **SAP ML**.
- **Empowers developers** to build intelligent business applications and administrators to operate AI at enterprise scale.

Generative AI with Minimal Coding

Low-code integration of GenAI capabilities directly into business applications

Classical & GenAI Use Cases

Unified lifecycle management for predictive ML and generative AI scenarios

SAP-delivered & custom use cases

Supports SAP-delivered & custom use cases

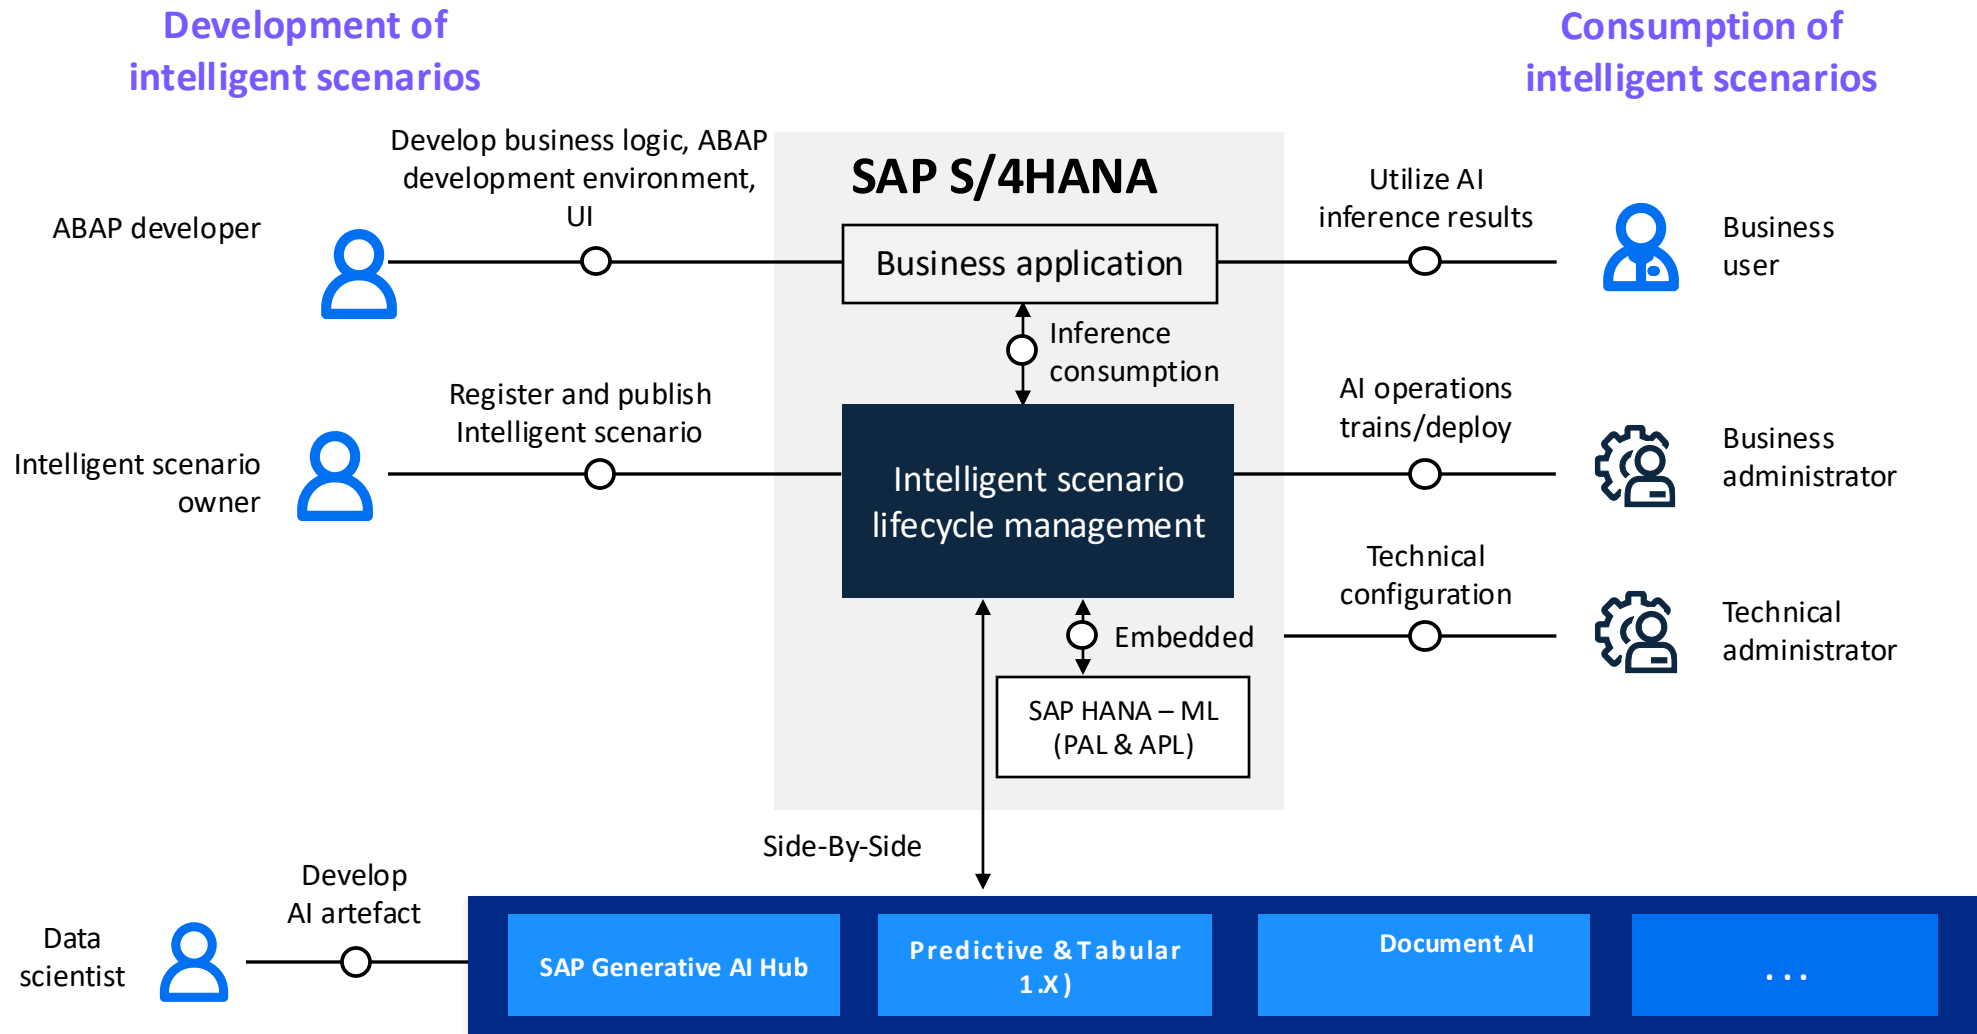

Available Across All Editions

SAP S/4HANA On-Premise, Cloud and SAP BTP ABAP Environment

CLOUD LIFECYCLE
MANAGEMENT DAY 2026

Roles and components in ISLM

Leveraging prebuilt AI in SAP S/4HANA with ISLM

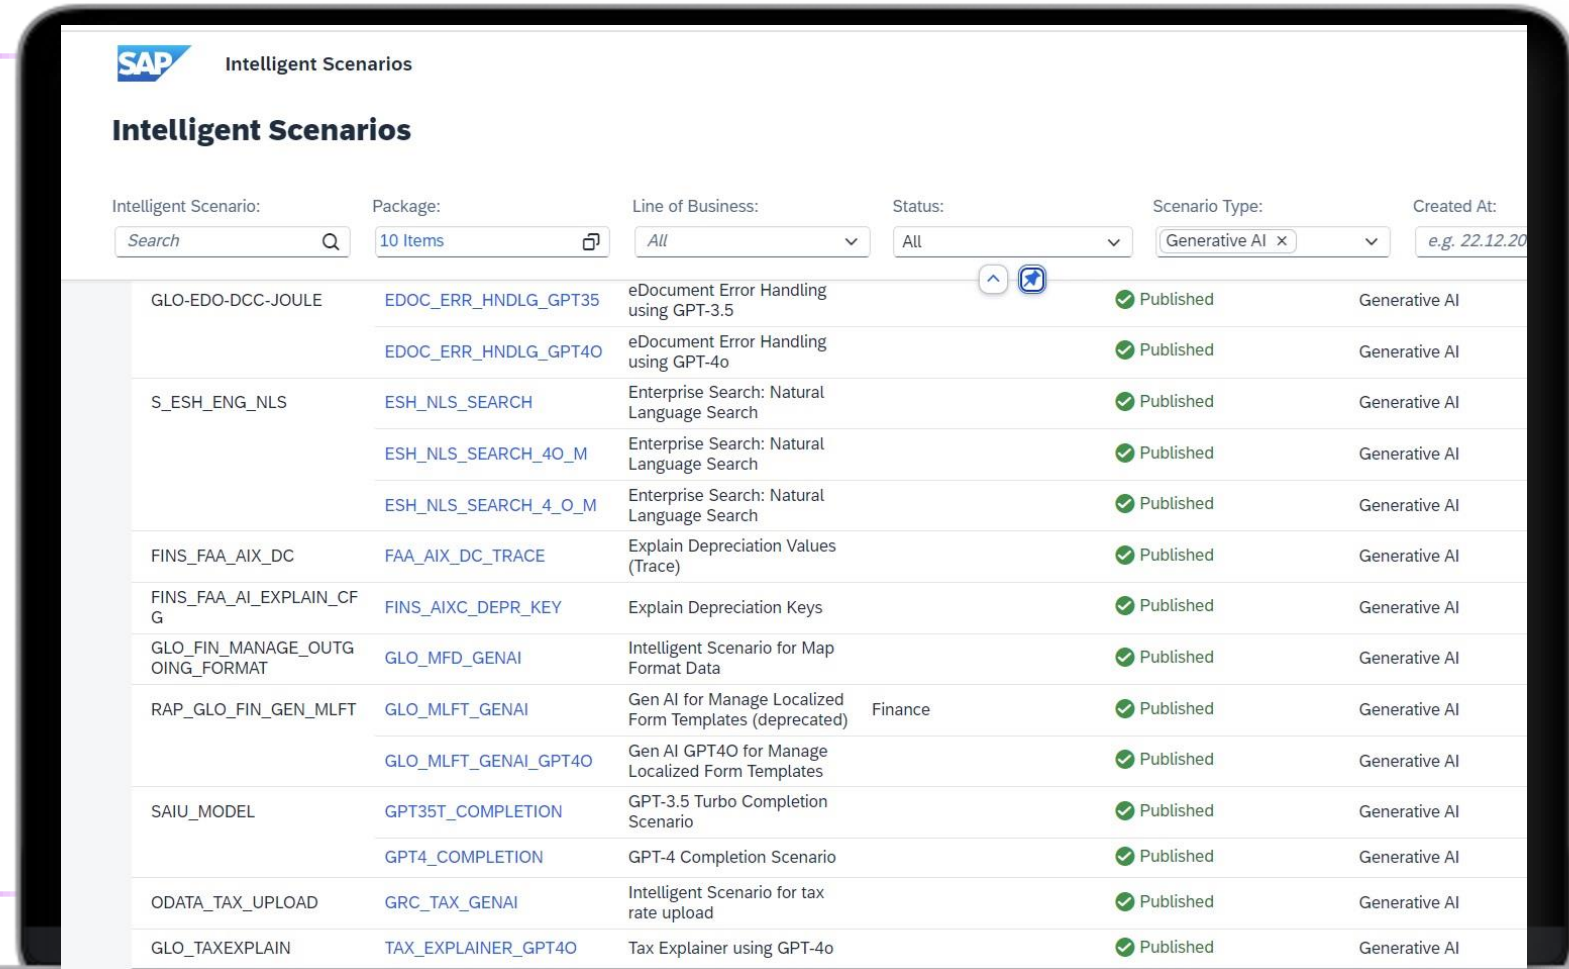

30 + Use cases available for **Finance, Sourcing and Procurement, Supply Chain, Manufacturing, and many more**

Agentic AI Use cases in pipeline

The screenshot displays the SAP Intelligent Scenarios web interface. At the top, the SAP logo and 'Intelligent Scenarios' title are visible. Below the title, there are filters for 'Intelligent Scenario' (with a search bar), 'Package' (showing 10 items), 'Line of Business' (set to All), 'Status' (set to All), 'Scenario Type' (set to Generative AI), and 'Created At' (showing a date range). The main content is a table listing various AI scenarios, each with a unique ID, a description, a status indicator (green checkmark for Published), and the scenario type (Generative AI).

Intelligent Scenario	Package	Line of Business	Status	Scenario Type	Created At
GLO-EDO-DCC-JOULE	EDOC_ERR_HNDLG_GPT35	eDocument Error Handling using GPT-3.5	✓ Published	Generative AI	
	EDOC_ERR_HNDLG_GPT40	eDocument Error Handling using GPT-4o	✓ Published	Generative AI	
S_ESH_ENG_NLS	ESH_NLS_SEARCH	Enterprise Search: Natural Language Search	✓ Published	Generative AI	
	ESH_NLS_SEARCH_4O_M	Enterprise Search: Natural Language Search	✓ Published	Generative AI	
	ESH_NLS_SEARCH_4O_M	Enterprise Search: Natural Language Search	✓ Published	Generative AI	
FINS_FAA_AIX_DC	FAA_AIX_DC_TRACE	Explain Depreciation Values (Trace)	✓ Published	Generative AI	
FINS_FAA_AI_EXPLAIN_CFG	FINS_AIXC_DEPR_KEY	Explain Depreciation Keys	✓ Published	Generative AI	
GLO_FIN_MANAGE_OUTGOING_FORMAT	GLO_MFD_GENAI	Intelligent Scenario for Map Format Data	✓ Published	Generative AI	
RAP_GLO_FIN_GEN_MLFT	GLO_MLFT_GENAI	Gen AI for Manage Localized Form Templates (deprecated)	✓ Published	Generative AI	Finance
	GLO_MLFT_GENAI_GPT4O	Gen AI GPT4O for Manage Localized Form Templates	✓ Published	Generative AI	
SAIU_MODEL	GPT35T_COMPLETION	GPT-3.5 Turbo Completion Scenario	✓ Published	Generative AI	
	GPT4_COMPLETION	GPT-4 Completion Scenario	✓ Published	Generative AI	
ODATA_TAX_UPLOAD	GRC_TAX_GENAI	Intelligent Scenario for tax rate upload	✓ Published	Generative AI	
GLO_TAXEXPLAIN	TAX_EXPLAINER_GPT4O	Tax Explainer using GPT-4o	✓ Published	Generative AI	

Create, integrate, and manage your custom-built AI use cases with ISLM

Standardized consumption and operation of machine learning scenarios for both flavors

1

Discover prebuilt use cases in ISLM

- Innovate with tailored use cases, Identify the technology
- Create an intelligent scenario

2

Operate in ISLM

- Maintain connection for the intelligent scenario
- Train ML model with customer data for classical AI and analyze quality of trained model

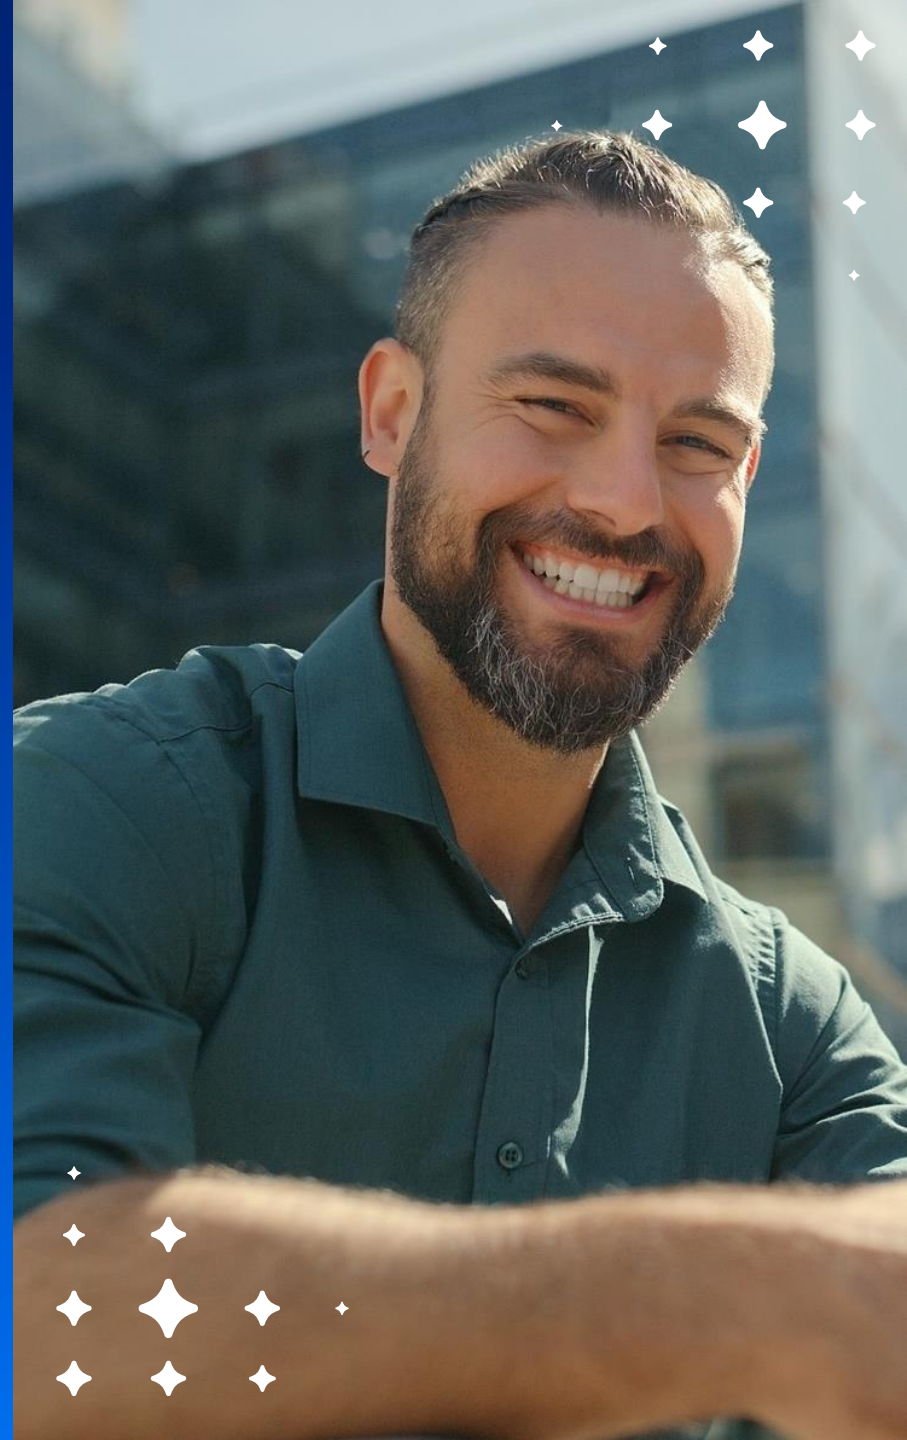

3

Run productively

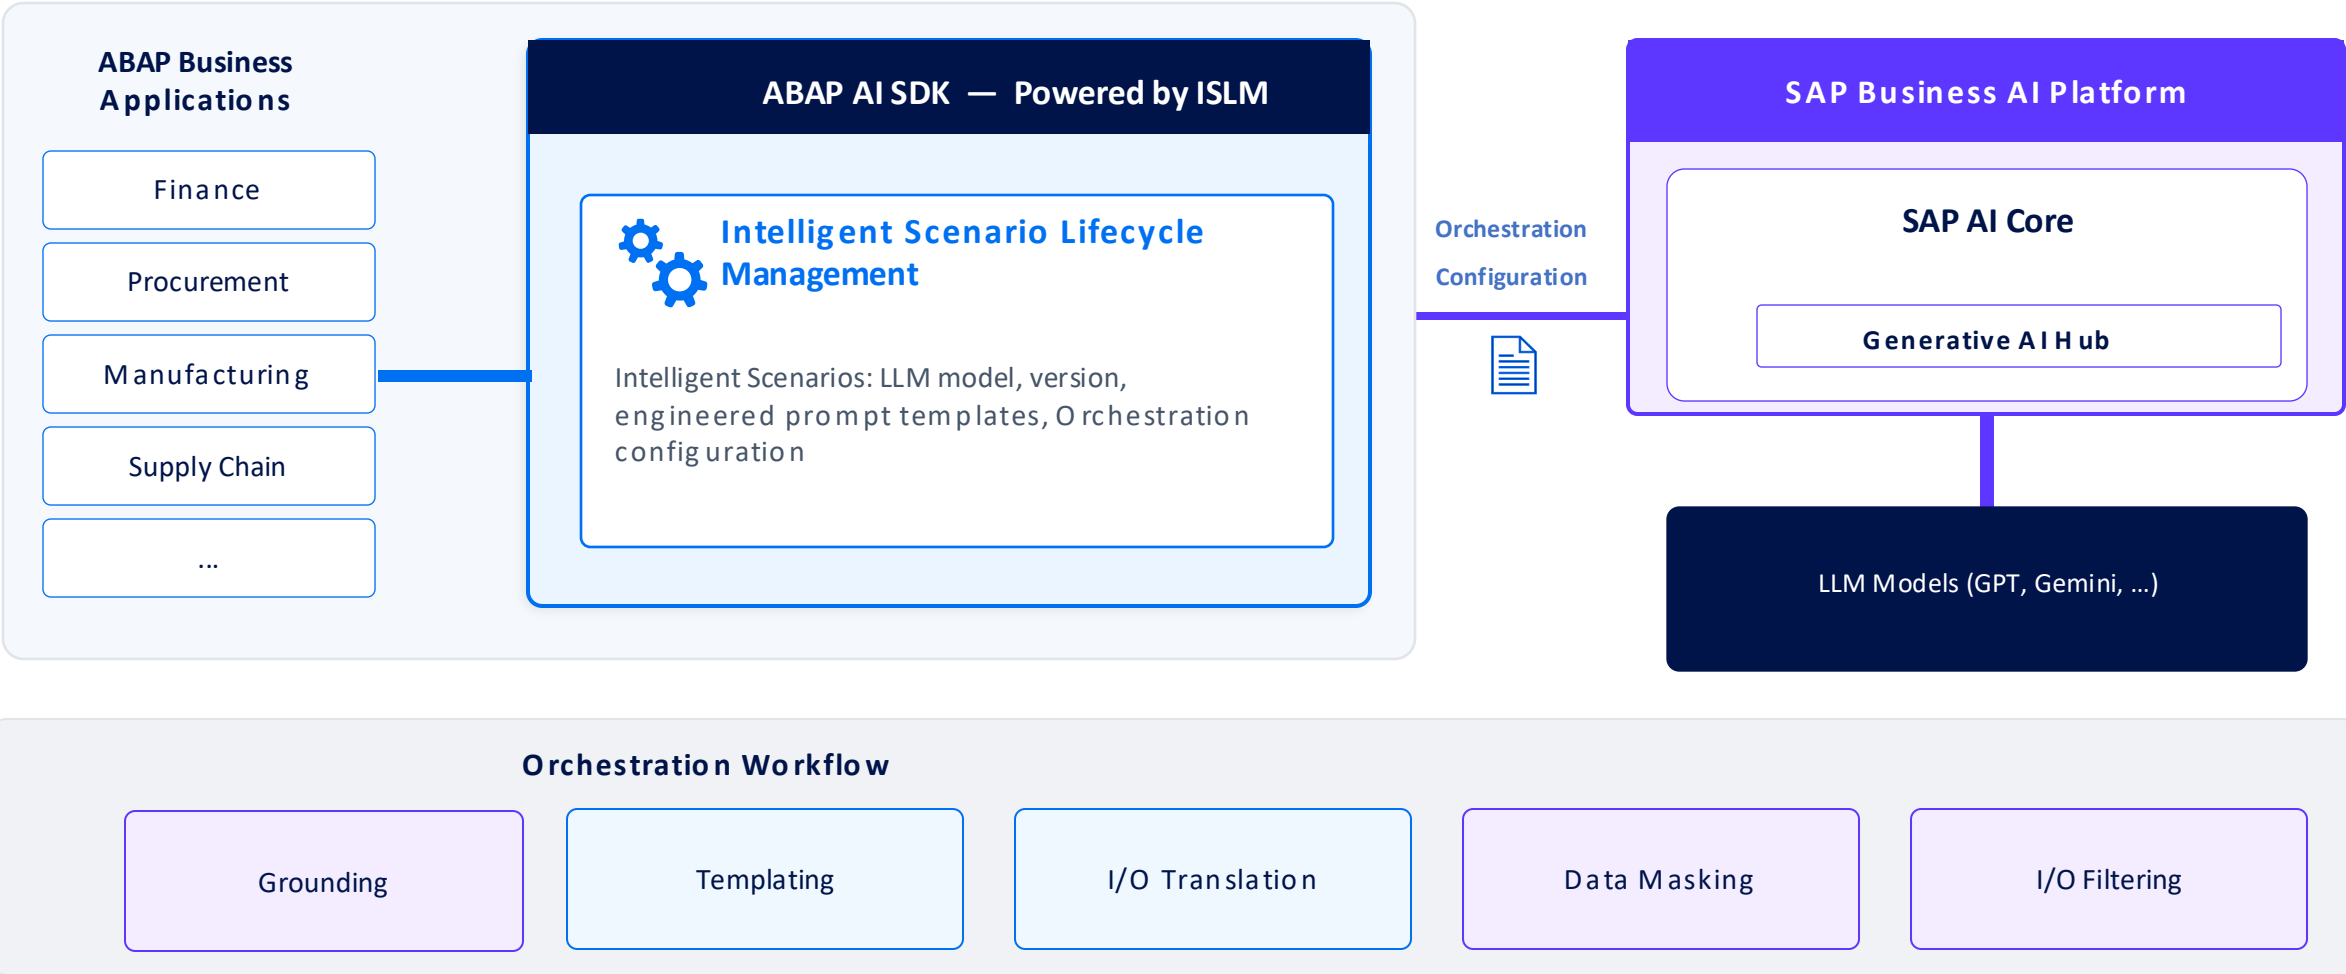

- Deploy and activate to specify which trained model to use in business application
- Model consumption in business scenario with SAP S/4HANA

Support for generative AI-based use cases

Leveraging ISLM for Generative AI Integration

A seamless bridge between SAP business applications and foundation models— **standardized, low-code, and easy to integrate.**

ISLM support for Generative AI use cases in SAP S/4HANA

- ✓ Represent generative AI-based use cases as Intelligent Scenario in ISLM.
- ✓ Connectivity Management to generative AI Hub and Lifecycle management to deploy LLM Models.
- ✓ Auto enablement for GenAI use cases.

The screenshot displays the SAP Intelligent Scenario Management (ISLM) interface. On the left, the 'AIU_SUMMARIZATION' scenario is shown with a 'Published' status and 'Turnkey Automation'. The recurrence pattern is 'Repeat Job Every 1 Week(s) on Monday Tuesday Wednesday Thursday Friday Saturday Sunday' with a 'Next Run' of '10/10/2025, 14:28:57'. Below this, a list of models is shown, with 'AIU_SUMMARIZATION_GPT_4O_MINI' selected and marked as 'Active'. On the right, the 'Model AIU_SUMMARIZATION_GPT_4O_MINI' deployment details are shown. It indicates '1 Trainings' and '1 Deployments'. A message states: 'Deployments with status 'Deployed' can be activated to be used for inference consumption in your business application.' Below this, a table lists the deployment details:

ID	Status	Active	Training ID	Type	Created By	Created At
1	Deployed	Active for all	1	Shared	Turnkey Operation	01/21/2025, 18:21...

The deployment description is 'Deployment triggered by turnkey'.

- ✓ Prompt management in ISLM to create, generate, and extend prompt templates
- ✓ ISLM and ABAP GenAI SDK integration to offer a unified solution to build generative AI Use cases

Integrate GenAI into business applications with ISLM

SAP AI Core

Generative AI hub

3

Consume Inference

- Consume ABAP APIs offered by ABAP AI SDK to execute prompts with “low code” manner
- Integrate response from LLM models into business applications

Supported products and Availability

ABAP AI SDK and Intelligent Scenario Lifecycle Management serve as integration components between business applications and large language models.

Products

- SAP BTP ABAP Environment as of release 2502
- SAP S/4HANA Cloud Public Edition as of release 2502
- SAP S/4HANA Cloud Private Edition and OnPrem as of release 2023 FPS02 via standard delivery.

Availability in lower releases

Down port to SAP S/4HANA Cloud Private Edition & On-Premise

Base SPs of following releases are supported:

- 2021
- 2022
- 2023

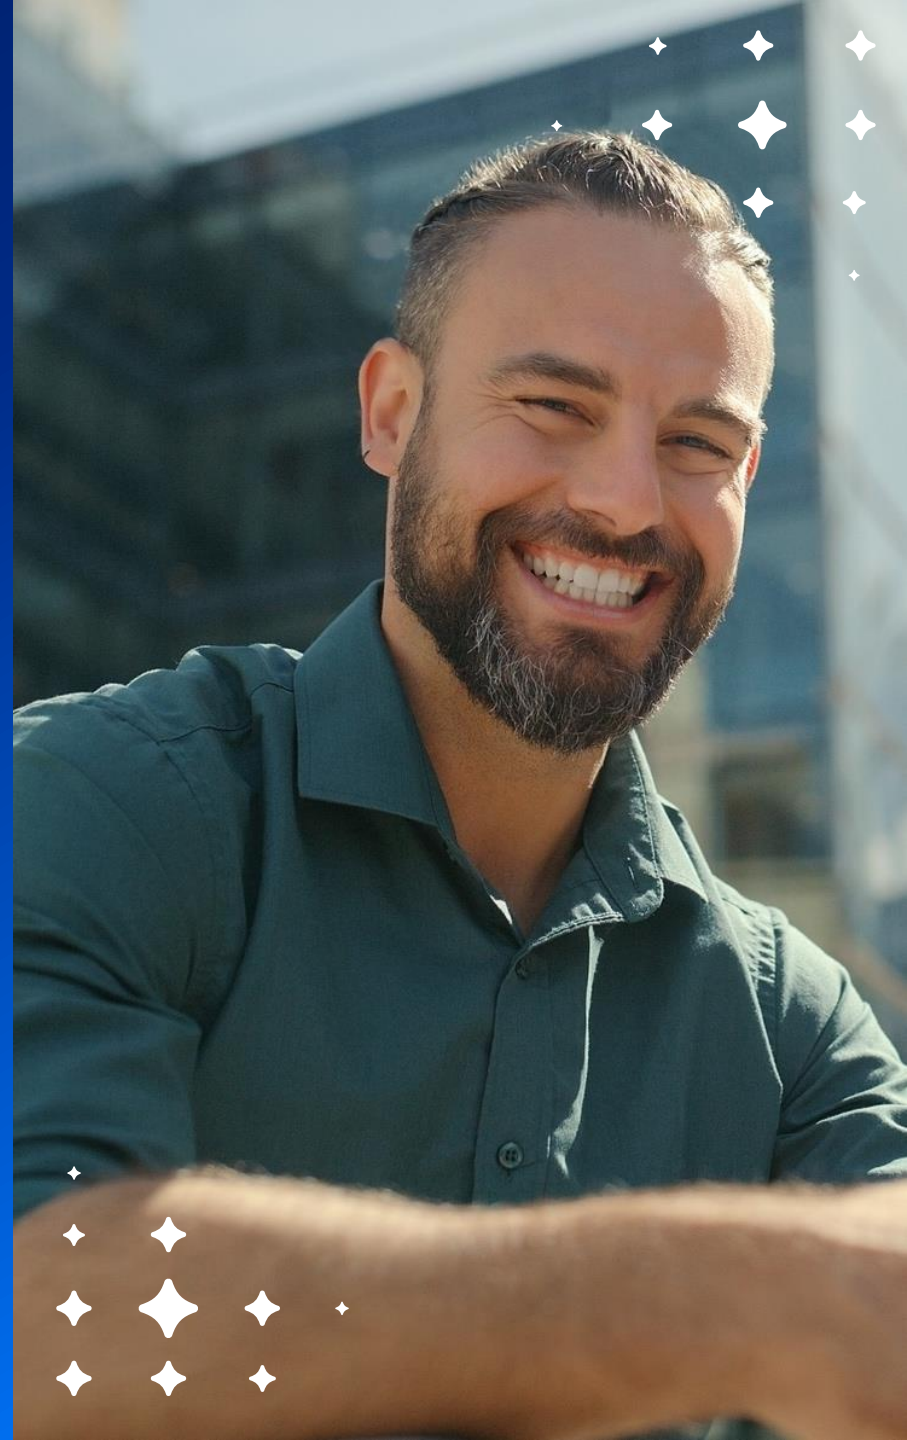

ISLM in lower SPs via Transport-based correction instructions (TCIs).

ISLM TCI: [3490653 - ISLM support for custom Gen AI scenario - SAP for Me](#)
