Agenda

- 01** Simplifying Private Cloud Operations
[Overview of Private Cloud Workspace](#)

- 02** Advancing with AI
[AI Innovations & Outlook for Private Cloud Workspace](#)
[Demo](#)

- 03** Low Touch Note Implementation

- 04** Key Takeaways

Cloud Operations reimagined

Private Cloud Workspace

8000+

customers

Private Cloud Workspace

Private Cloud Workspace

Monitor, orchestrate, and govern entire landscape in one place

Private Cloud Workspace

Private Cloud Workspace

Accelerated and Scalable end-to-end upgrades

Private Cloud Workspace

Private Cloud Workspace

Immediate answers across your landscape

Based on your requirement here are the recommended templates to create service request.

Create Initial User for ABAP System

Create technical or administration user(s) in client 000 of the selected ABAP system(s).

Important considerations:

...

Enable/Disable SAP* user in customer client for SAP ABAP System

Request to enable/disable SAP* user if login info lost or to only disable SAP* user in SAP ABAP system clients. You have 4-hour window once enabled.

...

Message Joule...

Joule uses AI, verify results.

Driven by
**your system
context**

Notes Recommendation & Implementation

SAP Notes Solution Components

Notes Recommendation

Maintenance Planner

AI-driven identification of
relevant SAP Notes for your system

**Note
Implementation**

Note Assistant

Batch Implementation of SAP Notes
Notes using Note Assistant or Note
Note Analyzer

Notes Recommendations

Maintenance Planner

Key features:

- Tailored recommendations for ABAP, Java and HANA systems, based on your SAP system landscape and SAP Notes metadata.
- Save **Views** and share it with other users.
- **Profile-based access** for all the recommended notes.
- Covers wide variety of SAP Notes categories:
 - SAP Security Notes (including Kernel)
 - Hot News
 - Performance-Relevant Notes
 - Legal Change Notes
- Download & implement notes in the following formats:
 - XML for Note Analyzer to analyse and check the implementation status of required SAP Notes.
 - XML for Note Assistant to analyse and implement valid SAP Notes for the relevant systems.

Batch Implementation

Note Assistant

Key features:

- Schedule job for identification of Notes
- Schedule jobs to implement multiple SAP Notes in the background
- Automatic identification and implementation of prerequisite SAP Notes is supported
- Background implementation of TCI is possible
- Provision for handling Notes containing manual activities
- Dashboard view
- Entire process is logged for review

The feature is available with **SAP Note [3693201](#)**

Note Analyzer

Engineers bundle notes for a certain topic area in scopes and scenarios.

In Regular Intervals:
Engineers creates XML containing several scopes & releases it to customer as an attachment in SAP Note

Customers (& Support Engineers) upload latest XML file in note analyzer(available in SNOTE) and get implementation overview of notes with one click.

Notes Recommendation & Implementation

Key Takeaways

Unified Operations

Visibility, orchestration and execution in one workspace

Intelligent Control

AI-assisted insights, guidance and decision support

LTNI

Implementation of critical SAP notes in a simplified low-touch way

Autonomous Operations

Progressing toward greater automation workflows
