Agenda

- 01** Overview of Change Management

- 02** Introduction to SAP Cloud Transport Management service

- 03** Using SAP Content Agent for content propagation

- 04** Feature Workflow in SAP Cloud ALM

- 05** Demo – Creation of Modifiable Transport Request

Operate on Cloud Landscape

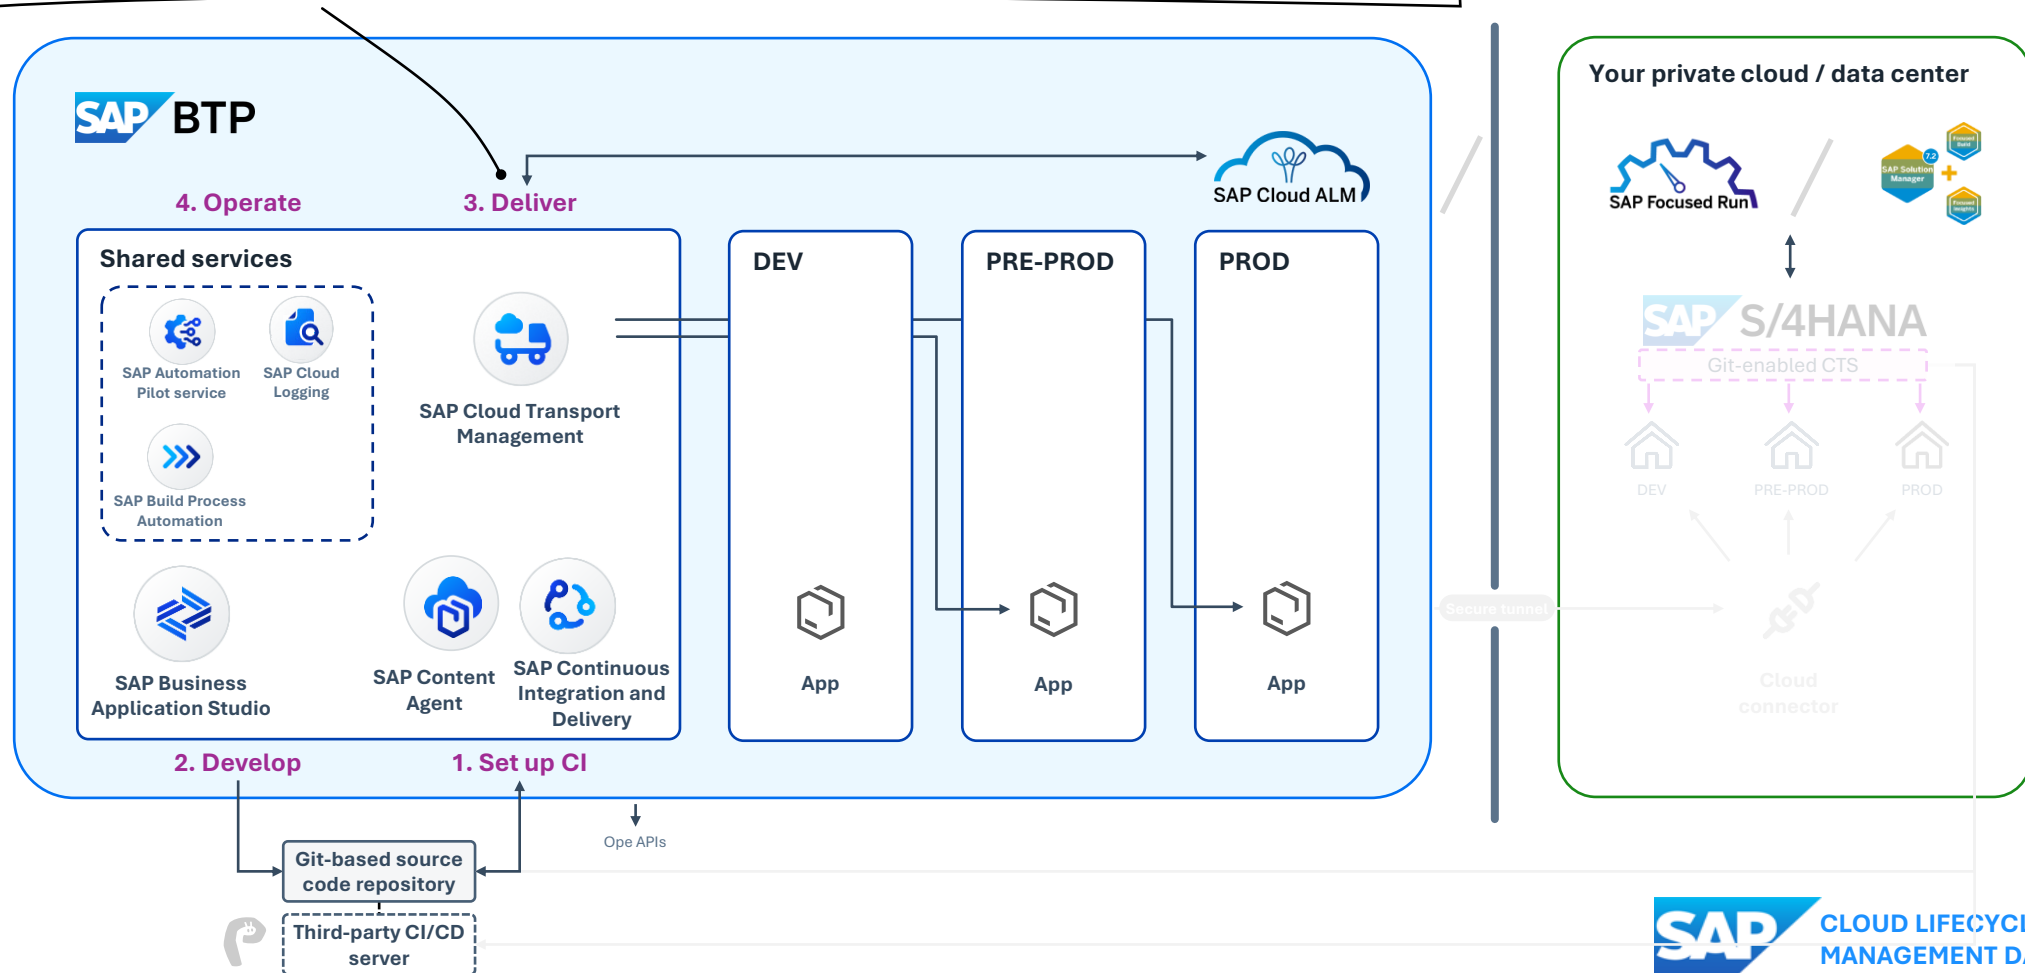

Deliver your cloud changes toward production

Standardized, enterprise-ready change mgmt. process – additional (regained) control, separation of concerns, auditing, synchronizing with private cloud changes

Alternatives:

Continuous deployment, CTS+, manual deployment

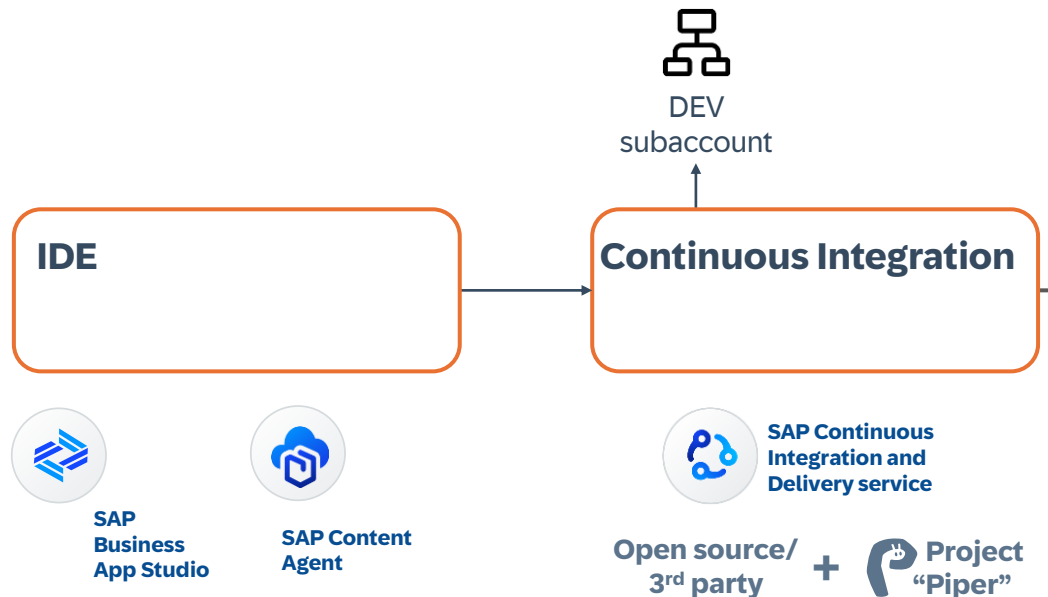

Deliver your cloud changes toward production

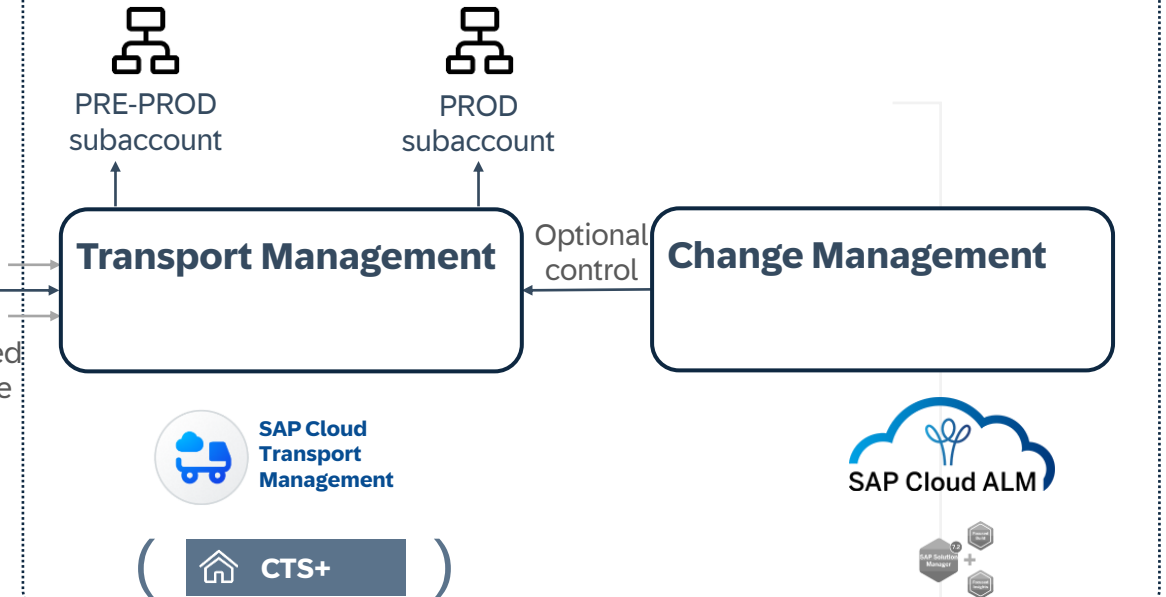

- Based on *Continuous Integration* principles (pipeline, tight feedback loop)
- Managed & owned by **local DevOps team**
- Verification of **single developer change**
- Typically, fully **automated**

- Based on strict *Transport Management* rules (policies, schedules)
- Centrally managed by ops/approvers
- Verification of release candidate version
- Typically done with manual confirmation

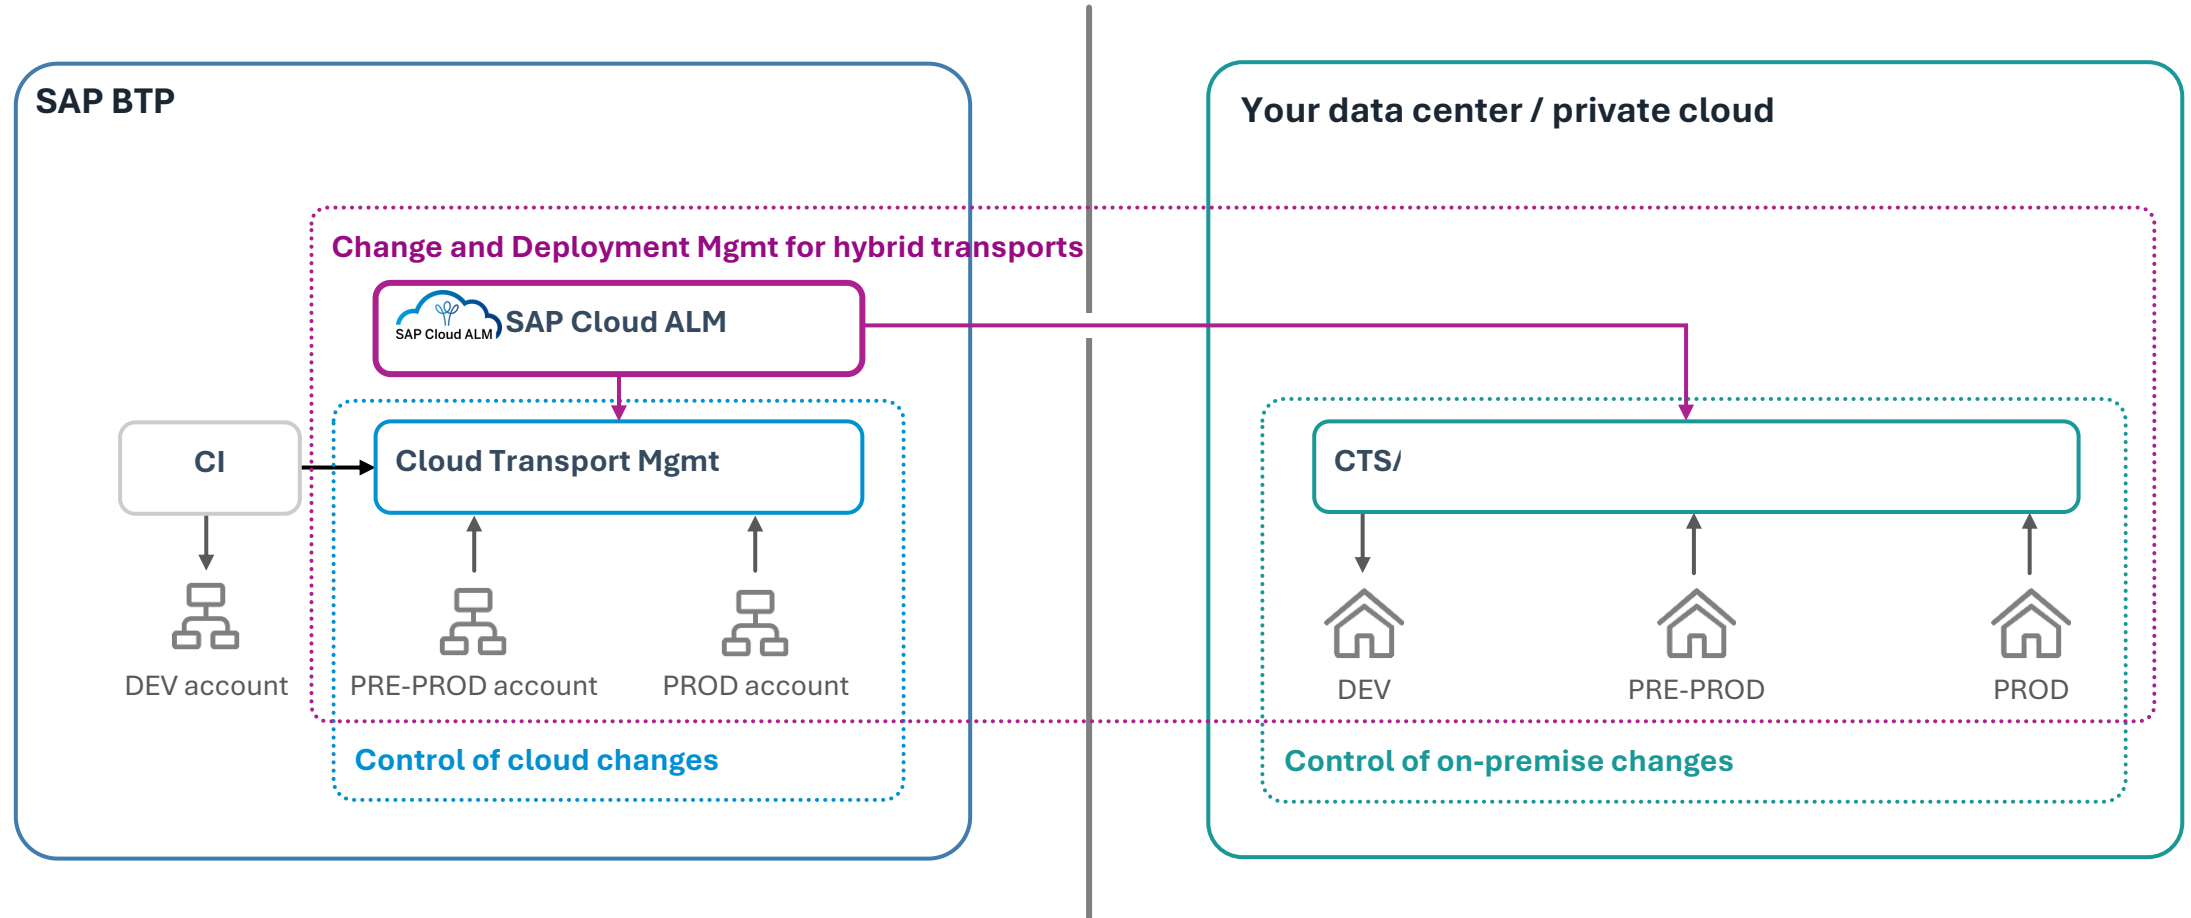

Development landscape

Delivery landscape

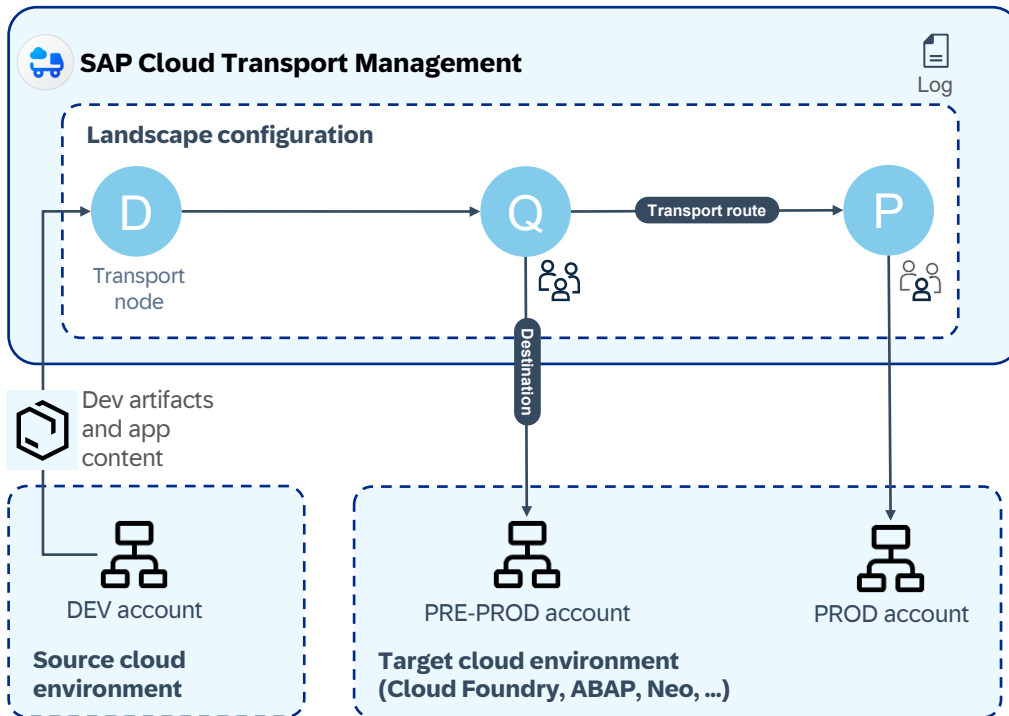

Integration with SAP Cloud ALM

Cloud Transport Management Service

provides a **cloud-based** transport management solution to handle the propagation of your changes in the cloud landscape

SAP BTP

- Allows to apply standardized, enterprise-ready change management process – no ABAP system required
- Add transparency on **audit trail of changes**
- Establish **separation of concerns** + regain control
- Option for **synchronizing transports** with on-premise artifacts

Available via [SAP BTP free tier](#), [PAYG](#), [BTPEA/CPEA](#)

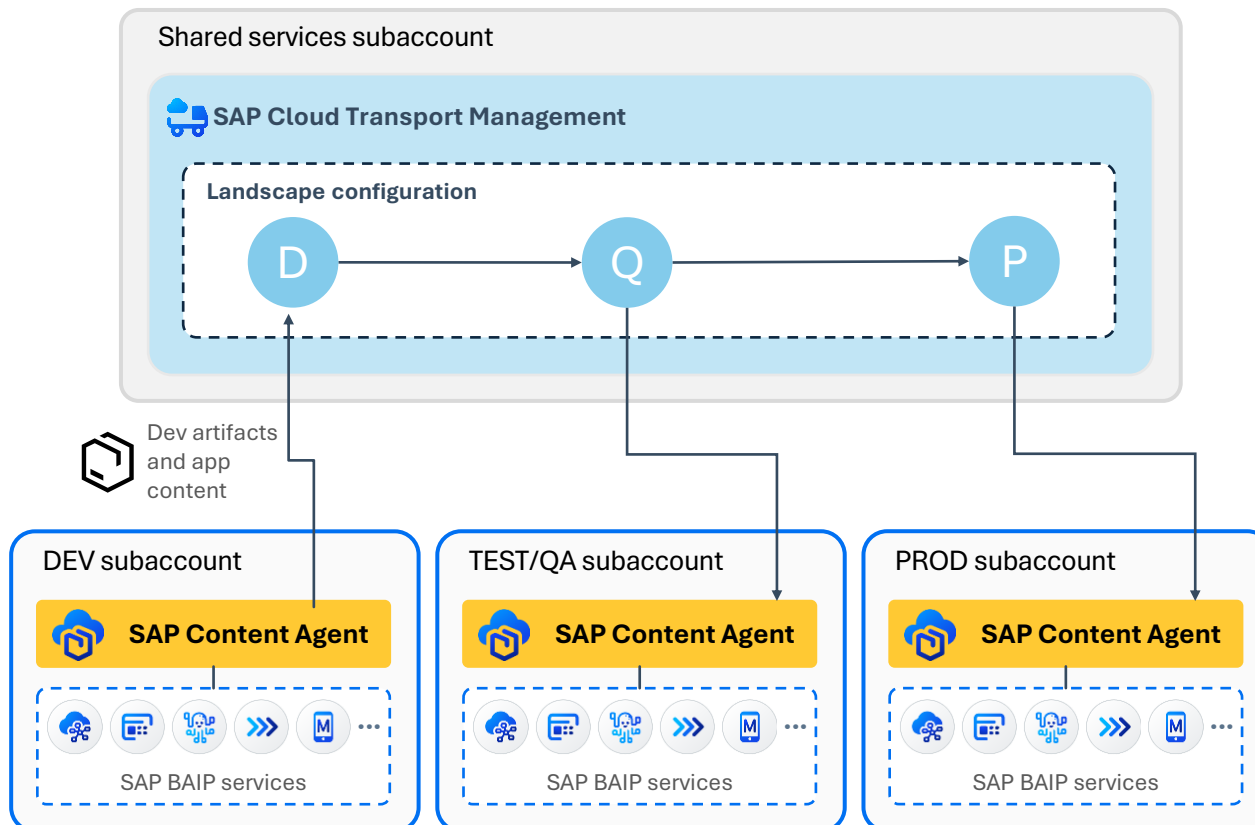

SAP Content Agent

SAP Content Management

acts as local agent on Cloud Foundry subaccount level that offers content management operations in SAP BAIP

SAP BTP

View lists of content types that are available in tenant

Export Multiple (and hybrid) content packages with its dependencies

Integration with SAP Cloud Transport Management service

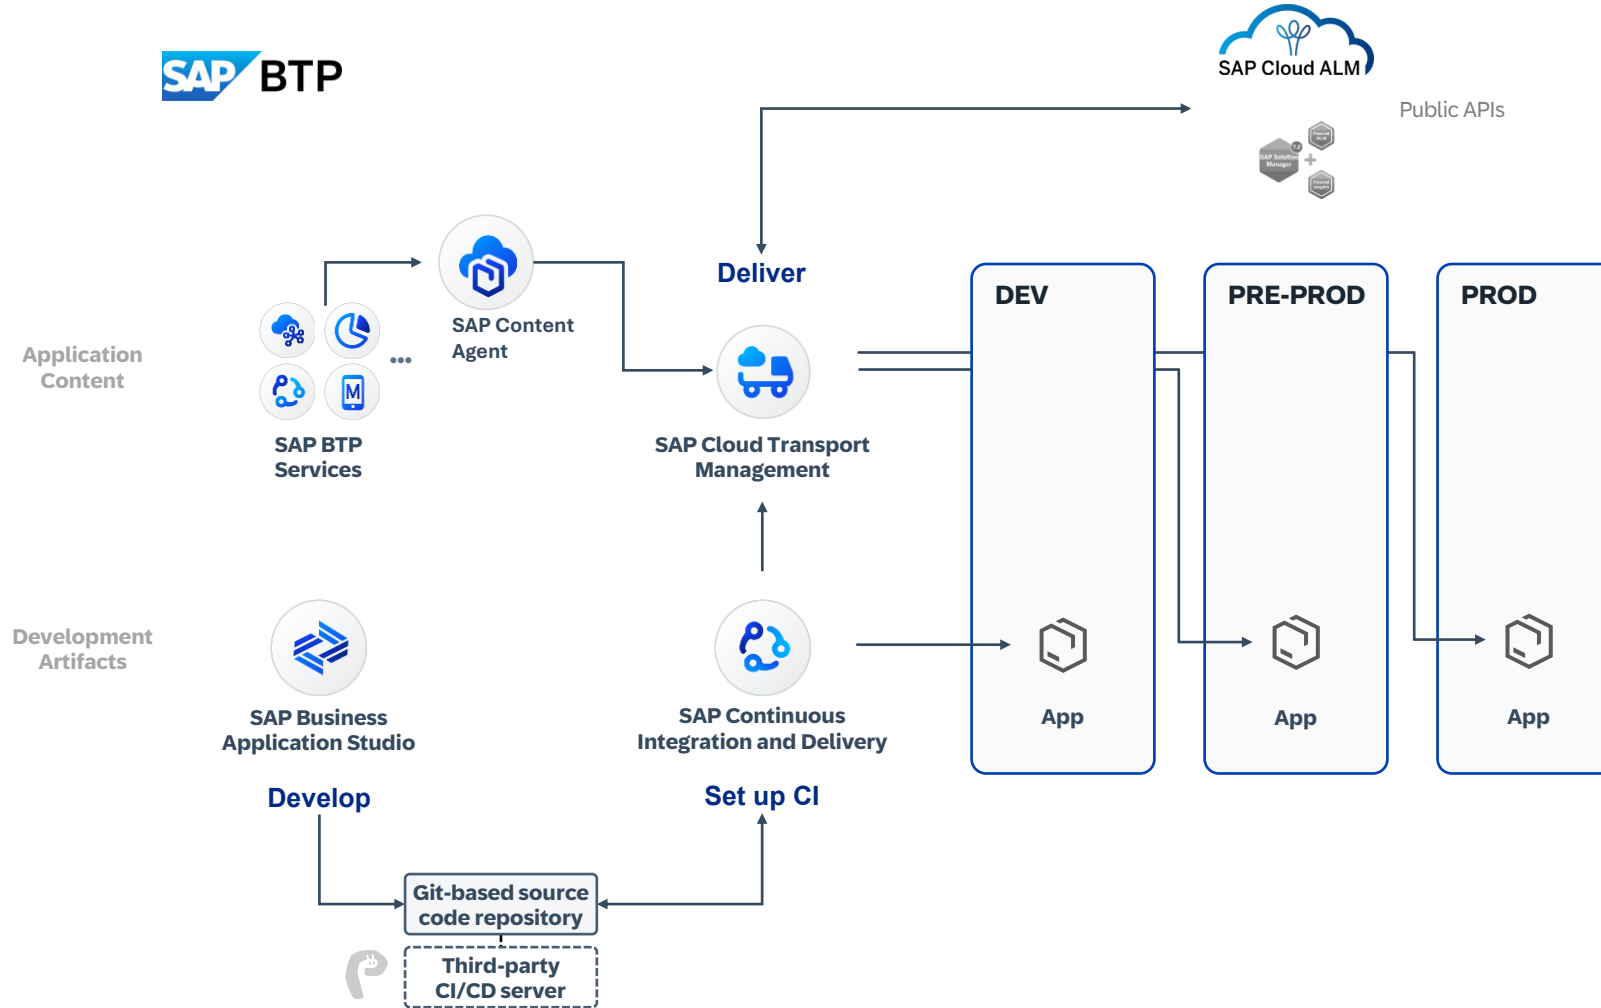

Enhanced configuration check and automation for destination creation

Offered with overall contract of SAP BTP and auto-entitled

Supported Content Types

Deliver your cloud changes toward production

Transport in SAP BTP ABAP & Cloud Foundry environment of

- **Development artifacts** (MTA archives – like CTS+)
- **Application content**
- Further content types planned

Manifold integration options:

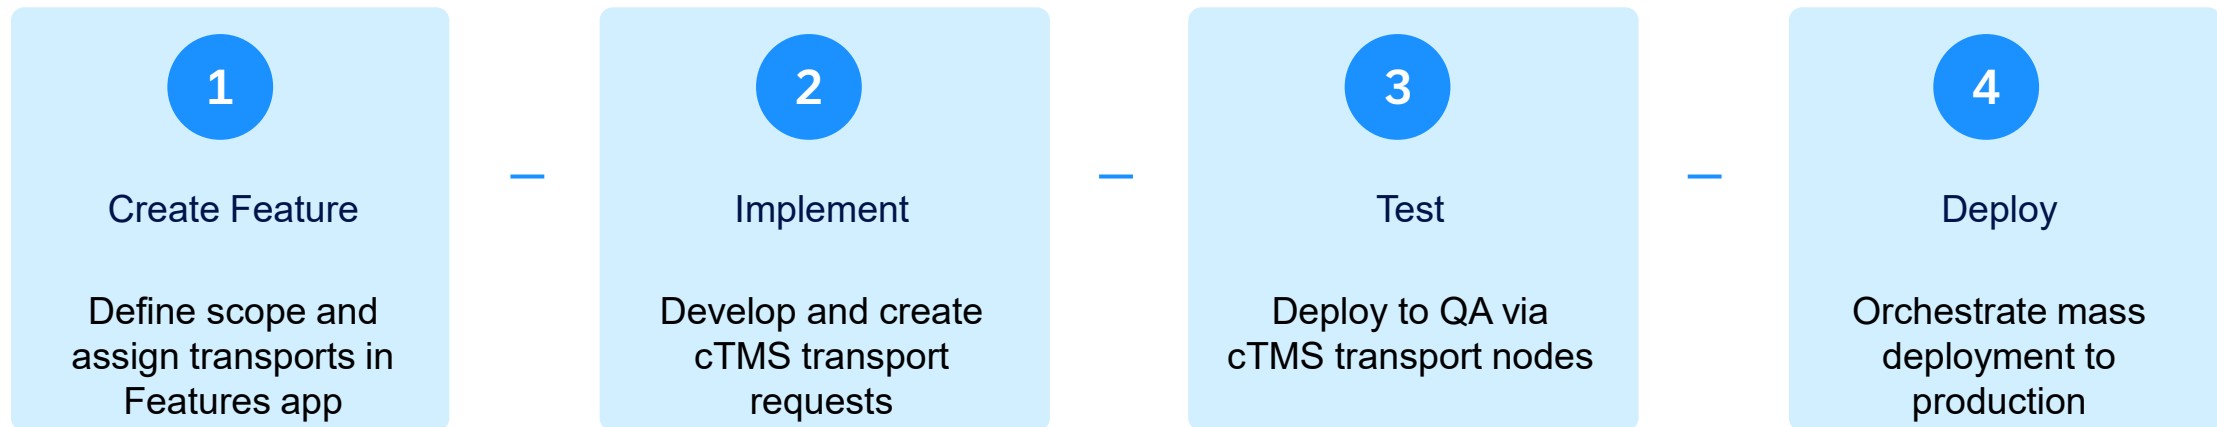

- With CI/CD
- Change Management by SAP Solution Manager and SAP Cloud ALM
- Open APIs

Feature Implementation

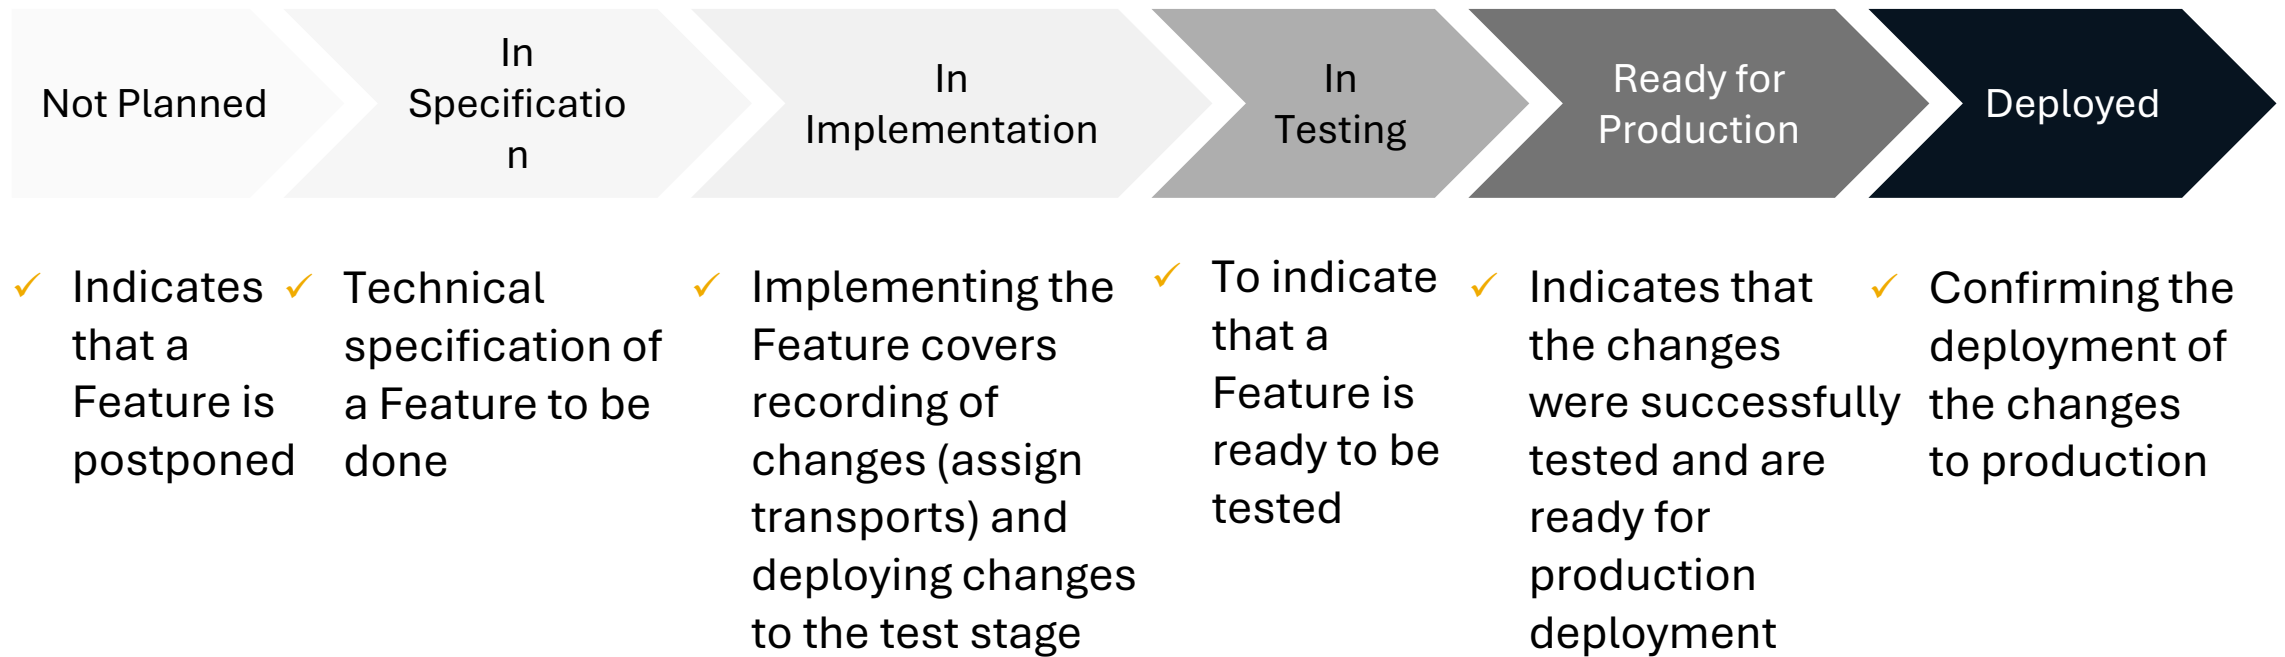

SAP Cloud ALM Features with cTMS

SAP Cloud ALM uses the Features app to manage change and deployment workflows. cTMS serves as a deployment provider, enabling orchestrated transport of cloud content across landscapes.

- Orchestration and mass deployment of features to production with a single click
- Modifiable transports: create, test, and release cTMS transports within features
- Deployment scheduler for scheduled cTMS transport runs with history logging
- External transport references: link and document transports managed outside Cloud ALM
- CI/CD integration: assign cTMS transport exports from CI pipelines to features

Feature Workflow

Lab Preview

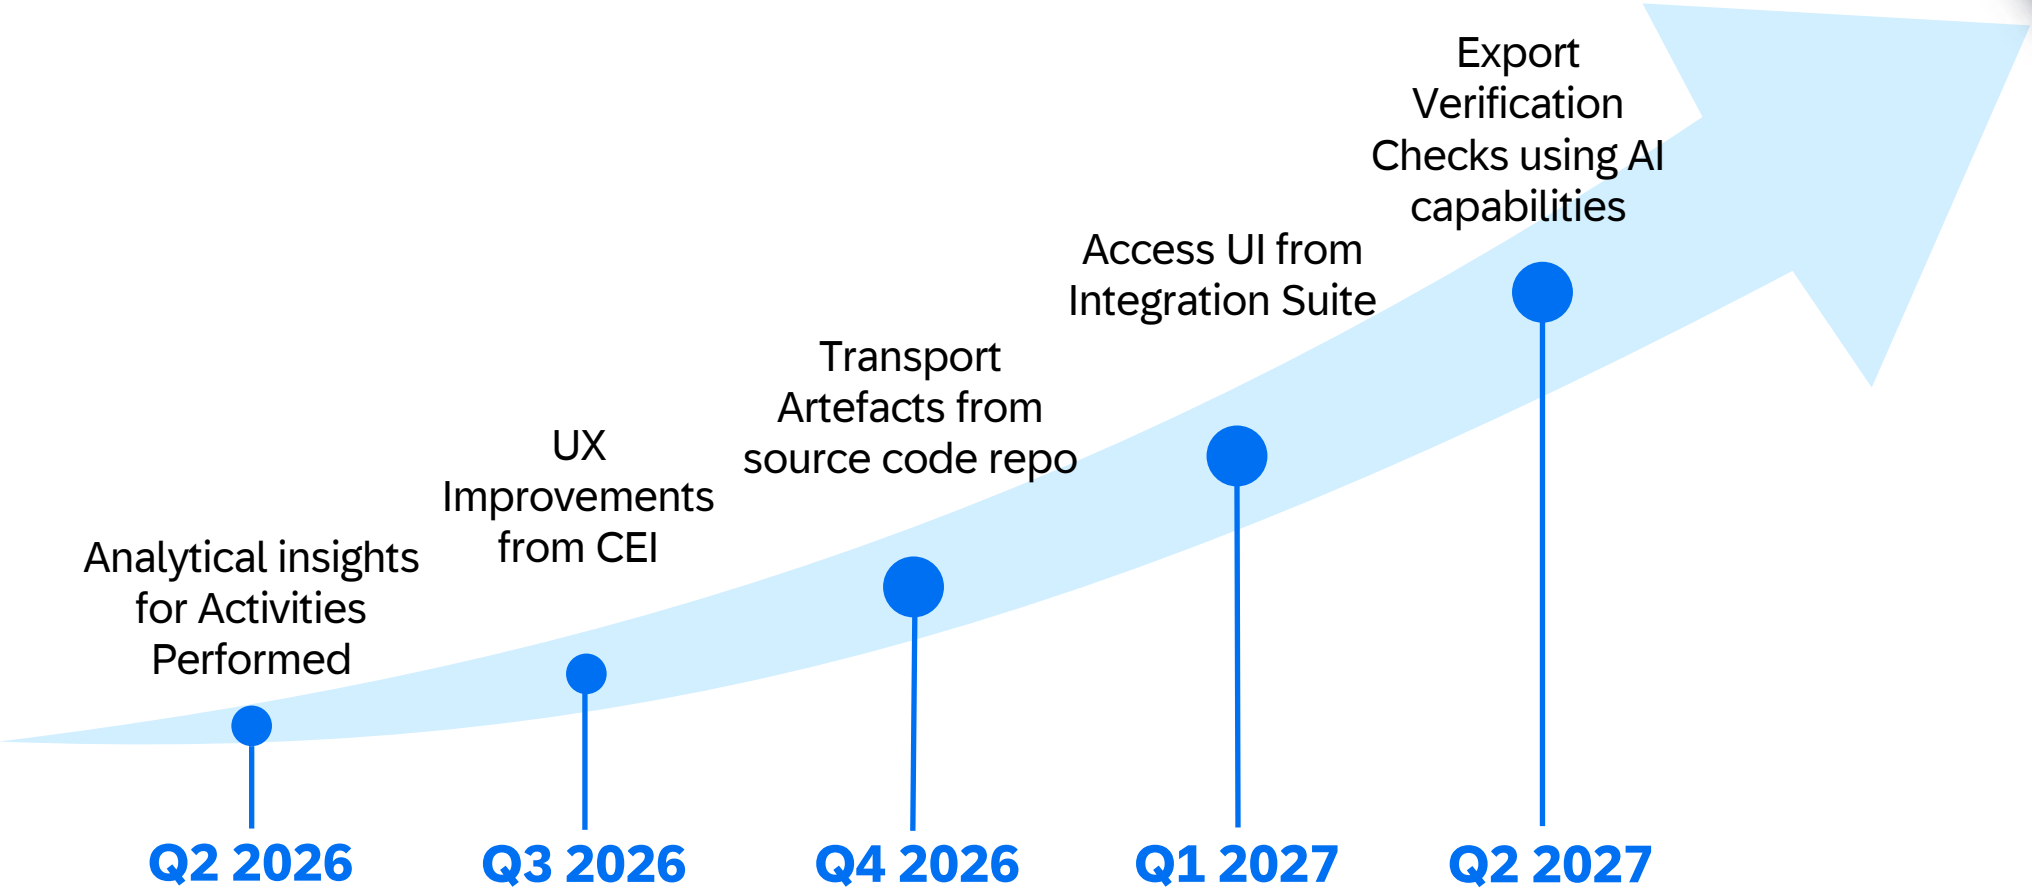

Demo

Roadmap

Roadmap for SAP Content Agent

"I personally always worked with transport of copies [in ABAP] and I think this whole modifiable transport request setup makes a lot of sense if you have bigger developments and bigger teams."
